

We enhance the systems you already run.

TradeGraph builds around your email, website, phone, and ops tools, then installs everything on site so your team keeps working the way they already know how. Law firms, clinics, and agencies can also add optional security assessments and AI phone agents. Those are scoped after discovery, not in the core install.

How we enhance your stack

Works with everything you already have

Your email, website, phone, and tools stay put. We build around what your team already knows.

Stops the work that was never worth doing manually

We automate repetitive questions, copy-paste between tabs, follow-ups, and chasing invoices.

Built specifically for how your business makes money

Custom integrations mapped to how your business actually makes money, not a generic template.

Results operators see

Speed to first lead response

Before: 15+ min median (online leads) · After: Under 5 min

21x more likely to qualify the lead

NAR / InsideSales lead response research

Missed-call conversion

Before: 62% won't leave voicemail · After: 85%+ captured on first touch

Jobs won vs lost to next Google result

Invoca home services data

Follow-up close rate

Before: ~18% manual follow-up · After: 25–35% automated rhythm

Recovered revenue from inbox leads

Catering CRM conversion studies

We connect what you already run: email, website, phone, booking, and books.

How we work

We sit with you and map the operation

Tell us what you run today: inbox, phone, booking, accounting, whatever keeps the doors open.

We build and test before we arrive

Your package is prepared in advance, checked, and ready to activate.

Install, train, and stand behind it

On-site activation targets about 30 minutes.

If you decide we are the right fit, you get our full implementation package and a 7-day satisfaction guarantee. If it is not working for your business, we make it right.

Ready when you are.

Meet with us, tell us what you run today, and walk away with a written plan whether you move forward or not.
